

Enjoy a healthy digital life with upscreen® Bacteria Shield

Did you know that digital devices are a source of bacterial infection?

Digital devices may look clean but germs are transferred daily to displays, causing them to carry more bacteria than an average toilet seat. Normal cleaning of the display doesn't remove these bacteria unfortunately. Through the fingers or through direct contact of your device with the skin, these bacteria can transfer to the face, mouth or nose, causing infections.

How our anti-bacterial technology works

Our technology embeds antibacterial agents on the screen protector's outer layer, killing the bacteria on your display. These active metal-oxide agents are harmless to the human body but deadly for the bacteria. This ensures that users are safe whenever using digital devices.

This antibacterial layer is also solvent resistant, allowing the antibacterial effect to remain in harsh environments.

This technology has been tested by Quality Labs BT GmbH in Nuremberg, an accredited laboratory by the German government, under the antimicrobial norm ISO 22196.

upscreen® Bacteria Shield screen protectors are available in Clear (High-Transparency) and Matte (Anti-Glare).

Anti-Bacteria Protection

Scratch Protection 2-3H

Bubble-Free Installation

Delicate Touch

Anti-Fingerprint

Upsafe your device.

BEDIFOL®

upscreen® is the professional screen protection brand of the Bedifol GmbH. Based in Constance, Germany, we are a leading European manufacturer and retailer of screen protectors. We offer an innovative portfolio of brands and products to ensure a scratch-free, anti-reflex, private and healthy digital life. We started over 12 years ago and we have continually developed our screen protection know-how and served millions of customers since then.

Our core competencies:

- Wide portfolio with more than 25K devices
- Quality manufacturing
- Rapid service
- Easy collaboration
- Individual consulting

Adaptation to customer requirements:

- Tailor-made according to customer designs
- OEM production
- Retail-ready packaging
- Corporate logo printing
